The NEW ENGLAND JOURNAL of MEDICINE

EDITORIAL OFFICES

February 21, 2013

Dear Physician:

As a resident nearing completion of your training, I'm sure that finding the right opportunity is a top priority for you. The *New England Journal of Medicine* (NEJM) is the leading source of information about job openings, especially practice opportunities, in the country. Because we want to assist you in this important search, a complimentary reprint of the classified advertising section of the February 21, 2013, issue is enclosed.

The NEJM CareerCenter website (NEJMCareerCenter.org) continues to receive positive feedback from physician users. Because the site was designed specifically based on advice from your colleagues, many physicians are comfortable using it for their job searches and welcome the confidentiality safeguards that keep personal information and job searches private. We've recently added the ability to search for *locum tenens* jobs, giving physicians the flexibility of looking for both permanent and *locum tenens* positions in their chosen specialties and desired geographic locations.

At NEJM CareerCenter, you will find:

- Hundreds of quality, current openings — not jobs that were filled months ago
- Email alerts that automatically notify you about new opportunities
- Sophisticated search capabilities to help you pinpoint jobs that match your search criteria
- A comprehensive resource center with career-focused articles and job-seeking tips
- An iPhone app that makes searching for jobs easier than ever

If you are not currently an NEJM subscriber, I invite you to become one. NEJM has recently added many exciting enhancements that further increase its relevance to you as you move forward in your career. If you are interested in subscribing, please call NEJM Customer Service at (800) 843-6356 or visit NEJM.org.

We've also included a reprint of the January 24, 2013, article "Clinical Practice: Alcohol Use in Adults" in this special booklet. Our popular Clinical Practice articles offer evidence-based reviews of topics relevant to practicing physicians. Expanding upon this series, we created Clinical Therapeutics — review articles that focus on a specific therapy (e.g., medication, device, or procedure) for a given clinical problem.

Other popular features include Videos in Clinical Medicine, which allow you to watch common clinical procedures, and Interactive Medical Cases, which present an evolving patient history and a series of questions and exercises designed to test your diagnostic and therapeutic skills. You can learn more about these features at NEJM.org.

A career in medicine is challenging, and current practice leaves little time for keeping up with changes. With this in mind, we developed these features to bring you the best, most relevant information in a practical and clinically useful format each week.

On behalf of the entire *New England Journal of Medicine* staff, please accept my wishes for a rewarding career.

Sincerely,

Jeffrey M. Drazen, MD

CLINICAL PRACTICE

Alcohol Use in Adults

Peter D. Friedmann, M.D., M.P.H.

This Journal feature begins with a case vignette highlighting a common clinical problem. Evidence supporting various strategies is then presented, followed by a review of formal guidelines, when they exist. The article ends with the author's clinical recommendations.

A 57-year-old man with a history of alcohol dependence comes for an annual examination. He reports that he has reduced his drinking to two beers two to three times per week and has not had five or more drinks on any occasion or any adverse consequences for the past 2 years. He states that he drinks “for his health” and that “it is under control.” How should his case be assessed and managed?

THE CLINICAL PROBLEM

Alcohol contributes to 79,000 deaths and \$223.5 billion in societal costs annually in the United States.^{1,2} Almost 9% of U.S. adults (approximately 13% of those who drink) meet the criteria for an alcohol-use disorder³ (Table 1)^{4,5}; the prevalence of alcohol-use disorders is higher in clinical settings.⁵ Alcohol consumption can have adverse social, legal, occupational, psychological, and medical consequences. The risk of harmful consequences and disability exists on a continuum⁶ (Fig. 1). Risk drinking is defined as an average of 15 or more standard drinks per week or 5 or more on an occasion for men and 8 or more drinks weekly or 4 or more on an occasion for women and people older than 65 years of age.⁵ A standard drink (i.e., 12 oz of beer, 5 oz of wine, or 1.5 oz of 80-proof liquor) contains 14 g of ethanol. High average consumption or frequent heavy drinking can be clinically silent yet have adverse health and social consequences^{7,8} (see Fig. S1 and S2 in the Supplementary Appendix, available with the full text of this article at NEJM.org).

Continued drinking despite adverse consequences constitutes an alcohol-use disorder⁴ (Table 1). The *Diagnostic and Statistical Manual of Mental Disorders*, fourth edition, text revision (DSM-IV-TR), differentiates abuse from dependence,⁴ but recent research suggests that they represent one disorder, which the proposed taxonomy for the DSM-5 would consolidate into a single spectrum.⁹ At the severe end of the spectrum, chronic, severe dependence is a recurring brain disorder characterized by loss of control over drinking, drinking despite harm, daily or near-daily drinking, a compulsion to drink (“craving”), tolerance, withdrawal, and substantial disability.

Despite observational studies that suggest that drinking lowers cardiovascular risk, the possibility of confounding raises concerns about recommending alcohol for heart health.¹⁰ Definitive data from trials are lacking to prove the cardiovascular benefits of alcohol, and the harms associated with alcohol are well established⁷ (Fig. S1 and S2 in the Supplementary Appendix). For example, beverage alcohol is a carcinogen, and even light drinking is associated with increased risks of oropharyngeal, esophageal, and breast carcinomas.¹¹ For people with a prior alcohol-use disorder, young adults at low risk for cardiovascular disease, women who are pregnant or trying to conceive, people with conditions that are caused or

KEY CLINICAL POINTS

ALCOHOL USE IN ADULTS

- Consuming 15 or more standard drinks per week or 5 or more on an occasion, for men, or 8 or more drinks weekly or 4 or more on an occasion, for women and people older than 65 years of age, confers a risk of alcohol-related harm.
- Drinking at these risk levels can be clinically silent, so clinicians should screen adults with validated questionnaires about consumption.
- When risk drinking is suspected, the clinician should, at a minimum, assess the consumption pattern, adverse consequences (including alcohol-related health problems and criteria for an alcohol-use disorder), and readiness to change drinking.
- Brief interventions can reduce alcohol consumption and adverse consequences in risk drinkers without alcohol dependence.
- Pharmacotherapy with brief medical-management counseling can reduce heavy drinking in persons with alcohol dependence.
- Clinicians should monitor and manage risk drinking and alcohol-use disorders longitudinally.

exacerbated by alcohol (Table S1 in the Supplementary Appendix), and people who are going to operate a vehicle or machinery, the risks of drinking outweigh any supposed health benefits.

REMISSION AND RECOVERY

The DSM-IV-TR definition of remission from dependence is based only on consequences and does not require abstinence.⁴ Full remission (i.e., no consequences) differs from partial remission (fewer than three consequences after 1 month of no consequences). Remission is considered to be “early” after 3 months and “sustained” after 12 months.⁴ Of U.S. adults with prior alcohol dependence, 52% continue to drink with consequences, 18% abstain completely, 12% remain heavy drinkers without consequences, and only 18% drink within lower-risk limits.¹² A long-term study showed that only 11% of men with alcohol dependence maintained nondependent drinking over a period of 50 years.¹³ Persons with alcohol dependence who have impaired self-control, severe alcohol problems, or affective symptoms are less likely than those without these features to maintain controlled drinking.¹⁴ The term “recovery,” as used in Alcoholics Anonymous (AA), can be defined as abstinence and active involvement in mutual support or treatment. In one study, 62% of persons with such involvement remained in remission at 3 years, as compared with only 43% of persons who did not receive help.¹⁵ Only one quarter of persons with alcohol dependence ever receive treatment.¹⁶

STRATEGIES AND EVIDENCE

SCREENING

Health care providers should screen for and counsel risk drinkers as part of routine medical and preventive care. Risk drinking is often asymptomatic, so screening tools that elicit consumption patterns have supplanted older ones that focused on consequences. The National Institute on Alcohol Abuse and Alcoholism (NIAAA) recommends that adults be screened annually with a validated self-report tool⁵; several brief tools have been validated in clinical settings (Table 2).^{5,17-19} Medicare covers this screening, plus up to four visits in 12 months to counsel those with positive screening results. If universal screening is not feasible, then inquiry about alcohol use should be prompted by the presence of conditions, symptoms, or signs associated with alcohol use (e.g., sleep disturbance, erectile dysfunction, and hypertension)²⁰ (see Table S1 in the Supplementary Appendix for a comprehensive list).

ASSESSMENT AND DIAGNOSIS

When risk drinking is suspected, the assessment should include consumption pattern, criteria for alcohol-use disorders (Table 1), alcohol-related health problems (Table S1 in the Supplementary Appendix), and readiness to change drinking. Evaluation of consumption includes the typical number of days per week on which alcohol is consumed, the number of standard drinks consumed on a typical day, the maximum number of

standard drinks consumed on an occasion, and the number of days per month of heavy drinking (five or more drinks for men and four or more for women). Frequent heavy drinking or high severity scores on screening tools are associated with an alcohol-use disorder. For example, a score of 7 to 9 on the Alcohol Use Disorders Identification Test–Consumption Questions (range, 0 to 12, with higher scores indicating risk drinking) (Table 2) is associated with a likelihood ratio of more than 3 for alcohol dependence.²¹ In patients with positive screening results for risk drinking, a report of drinking in physically hazardous situations or drinking more or for longer than intended is 94 to 95% sensitive and 62 to 77% specific for an alcohol-use disorder.²² Brief assessment can also include a symptom checklist (Table 1).

For patients with an alcohol-use disorder, either current or past, the history taking should include dates, duration, and type of prior substance-use treatment; other substance use; involvement in support groups; attempts to cut back and periods of sobriety; the circumstances surrounding recurrent drinking; and the recovery environment — i.e., whether the patient has a supportive place to live (e.g., with sober, supportive family members) and a structured daily life (e.g., regular employment or school attendance). This information is useful in identifying triggers for drinking and helping the patient devise strategies to avoid the triggers and thus reduce the risk of relapse²³ (Table S2 in the Supplementary Appendix).

Much research on behavioral change supports the idea that assessment of the patient's motivation to change is an essential bridge from screening to brief intervention.²⁴ A simple approach is to ask, "On a scale of 0 to 10, how ready are you to make a change right now in your drinking?" with 10 indicating ready to change right now, and 0 not ready to consider a change.²⁴ During a brief intervention, this scale can be used to elicit self-motivating statements. If the patient rates his readiness as 3, the clinician can inquire, "Why did you not say 0?" which will prompt the patient to voice reasons for considering a change. Discussion of how drinking and its consequences may conflict with the patient's beliefs, values, and goals may also build motivation.²⁴

Table 1. Checklist of DSM-IV-TR Criteria for Alcohol-Use Disorders.*

Criteria for alcohol abuse

The patient's drinking has repeatedly caused or contributed to one or more of the following adverse consequences in the past 12 months:

- Risk of bodily harm (e.g., drinking and driving, operating machinery, or swimming)
- Problems with relationships (family or friends)
- Interference with home, work, or school role obligations
- Arrests or other legal problems

Criteria for alcohol dependence

The patient has had three or more of the following behavioral or physiological consequences in the past 12 months:

Behavioral consequences (loss of control or preoccupation)

- Has repeatedly exceeded drinking limits
- Has not been able to cut down or stop (repeated failed attempts)
- Has continued drinking despite recurrent physical or psychological problems
- Has spent a lot of time drinking (or anticipating or recovering from drinking)

- Has spent less time on activities that had been important or pleasurable

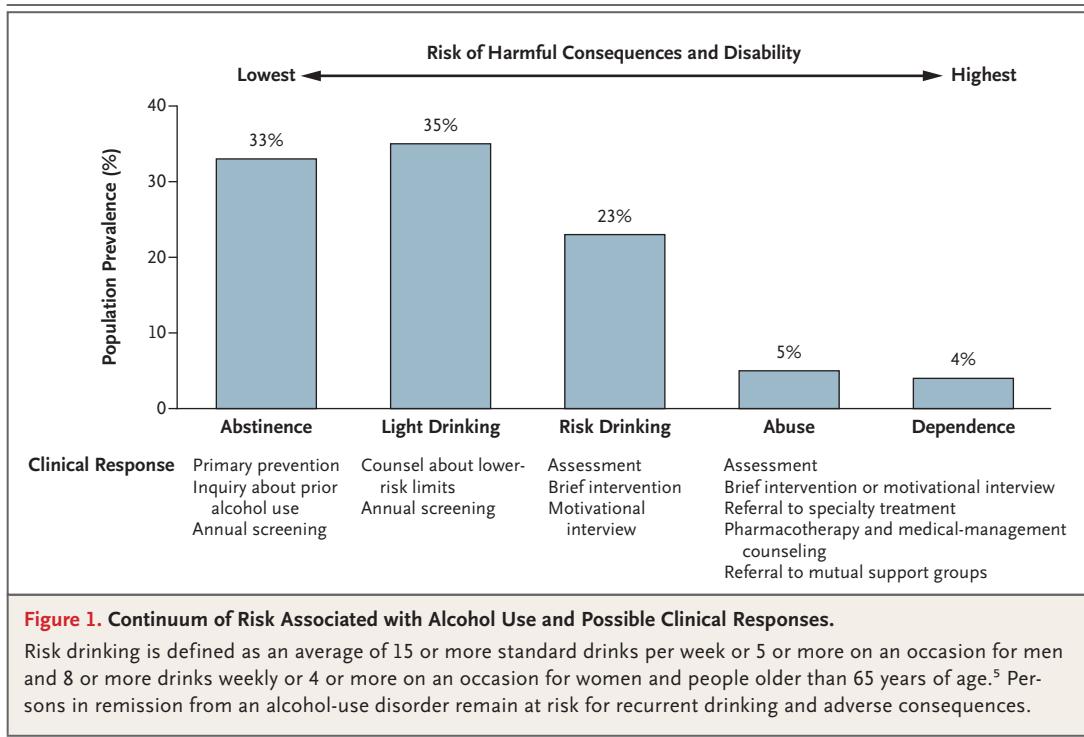

Physiological consequences

- Has shown tolerance (needed to drink a lot more to get the same effect)
- Has had signs of withdrawal (tremors, sweating, nausea, or insomnia when trying to quit or cut down)

* The criteria are based on the *Diagnostic and Statistical Manual of Mental Disorders*, fourth edition, text revision (DSM-IV-TR).⁴ A patient who meets the criteria for both abuse and dependence is considered to have dependence, the more severe disorder. The table is adapted from the DSM-IV-TR and information from the National Institute on Alcohol Abuse and Alcoholism.⁵

BRIEF INTERVENTIONS

Brief interventions provide nonjudgmental, individualized feedback about drinking and its potential harms, recommendations about lower-risk drinking, negotiation of an acceptable goal for changing risk drinking, and arrangement of follow-up to assess progress toward the goal. If the assessment does not identify high-risk features, reducing consumption to a level below the threshold for risk is a reasonable goal. Meta-analyses of randomized trials in primary care settings have shown that brief interventions reduce consumption in risk drinkers without alcohol dependence; these interventions have also been reported to reduce alcohol-related harms and mortality.²⁵ Data regarding the efficacy of brief interventions are less consistent in acute

care settings where alcohol dependence predominates.^{26,27}

Randomized clinical trials have shown that online interventions that assess drinking patterns and provide normative feedback can modestly reduce risk drinking.²⁸ As with any brief intervention, follow-up care should focus on reinforcing success or providing a referral for specialty treatment if the patient cannot stop or cut back.

SUPERVISED WITHDRAWAL

Supervised withdrawal is used to manage acute withdrawal and its complications, ensure a supportive environment in which to initiate sobriety, and link the patient to specialty treatment. Most patients with alcohol dependence can withdraw without supervision or medication. For patients in mild-to-moderate withdrawal and for those who live in an unstable environment for recovery, clinically managed residential detoxification programs deliver supportive care; some are medically supervised and provide medication. A medically monitored inpatient or residential setting is appropriate for patients at risk for severe withdrawal (e.g., persons with acute medical illness, an age of 60 years or older, misuse of sedative hypnotic agents, daily consumption of 20 or more

standard drinks, or a history of severe withdrawal, seizures, or alcohol withdrawal delirium), for whom long-acting or intermediate-acting benzodiazepines are the standard of care.²⁹ Symptom-triggered doses of benzodiazepines administered by trained personnel using a withdrawal-severity tool are preferable to fixed doses, except for patients who are unable to communicate, those receiving medications that mask withdrawal manifestations (e.g., beta-adrenergic antagonists), and those at highest risk for severe withdrawal (who should receive medical care in a hospital).

SPECIALTY TREATMENT

Specialty treatment provides a supportive, structured environment for early sobriety, psychosocial counseling, and facilitated mutual support. High-quality specialty providers also address medical problems and psychological and social instability and initiate alcohol pharmacotherapy. Specialty treatment should be longitudinal and comprehensive, with adjustment in intensity and setting according to the severity of the disorder, coexisting conditions, treatment response, and the recovery environment. Most specialty treatment is delivered in a regular outpatient setting, but persons with an unstable recovery environment or a severe alcohol-use disorder can require

Table 2. Brief Self-Report Screening Tests for Risk Drinking.

Test	Positive Result	Test Characteristics
Single item ^{5,17}		
How many times in the past year have you had five (four for women) or more drinks in a day?	≥1 time	82% sensitive, 79% specific for unhealthy use
Alcohol Use Disorders Identification Test–Consumption Questions (AUDIT-C) ¹⁸		
Question 1: How often did you have a drink containing alcohol in the past year? Never: 0 points Monthly or less: 1 point Two to four times per month: 2 points Two or three times per week: 3 points Four or more times per week: 4 points	For women, ≥3 points; for men, ≥4 points; a score of 7 to 10 suggests alcohol dependence	73% sensitive, 91% specific for alcohol-use disorder; 86% sensitive, 89% specific for alcohol dependence
Question 2: How many drinks did you have on a typical day when you were drinking in the past year? One or two: 0 points Three or four: 1 point Five or six: 2 points Seven to nine: 3 points Ten or more: 4 points		
Question 3: How often did you have six or more drinks (four or more for women) on one occasion in the past year? Never: 0 points Less than monthly: 1 point Monthly: 2 points Weekly: 3 points Daily or almost daily: 4 points		
Quantity, frequency, maximum ^{5,19}		
Question 1: On average, how many days per week do you drink alcohol?	For men, >4 drinks per week or >4 per occasion; for women or persons >65 yr of age, >7 drinks per week or >3 per occasion	83% sensitive, 84% specific for alcohol abuse or dependence in the past year
Question 2: On a typical day when you drink, how many drinks do you have?		
Question 3: What is the maximum number of drinks you had on any given occasion during the past month?		

intensive outpatient treatment, day-hospital treatment, or residential treatment. Counseling can be provided in group, individual, couples, or family sessions. A systematic review of seven multi-site studies of treatment for alcohol-use disorders showed that 17 to 33% of patients were abstinent in the year after a single treatment episode, and another 7 to 12% reduced their drinking and no longer had adverse consequences.³⁰

Specialty treatment should be recommended if the assessment shows any alcohol-use or drug-use disorder, continued use despite consequences (including medical contraindications), or unsuccessful attempts to stop or cut back. Clinicians should

preferentially refer patients to programs that use approaches proved to be effective in randomized trials, such as motivational-enhancement therapy, cognitive-behavioral therapy, 12-step facilitation therapy, community-reinforcement approach, behavioral couples therapy, and pharmacotherapy.³⁰

PHARMACOTHERAPY

Medications approved by the Food and Drug Administration (FDA) for the treatment of alcohol dependence are disulfiram, acamprosate, and two forms of naltrexone (oral and extended-release injectable). All are modestly effective³¹⁻³⁴ but greatly underused.³⁵ Table 3 lists their mecha-

Table 3. Medications for Alcohol Dependence.*

Medication	Action	Contraindications	Precautions	Adverse Reactions	Evidence of Efficacy	Adult Dose
Disulfiram	Inhibits intermediate metabolism of alcohol, causing flushing, sweating, nausea, and tachycardia if patient drinks	Use of alcohol or alcohol-containing preparations, treatment with metronidazole, coronary artery disease, severe myocardial disease, hypersensitivity to rubber (thiuram)	Monitor liver function; patient should avoid alcohol in diet, OTC medications, or toilettries; use caution if patient has cirrhosis, cerebrovascular disease, psychosis, diabetes mellitus, epilepsy, hypothyroidism, or renal impairment or takes isoniazid, anticoagulants, metronidazole, or phenytoin; pregnancy category C†	Metallic taste, dermatitis, transient mild drowsiness, hepatotoxic effects, optic neuritis, peripheral neuropathy, psychotic reactions	Systematic review of 11 trials: improved short-term abstinence by a factor of almost 4 when daily dosing was supervised ³¹	250 mg by mouth daily (range, 125 to 500)
Acamprosate	Stabilizes glutamate and GABA systems	Kidney disease with creatinine clearance of <30 ml/min	Evaluate renal function; adjust dose if patient has moderate kidney disease with creatinine clearance of 30–50 ml/min; use caution if patient has depression or suicidal ideation and behavior; pregnancy category C†	Diarrhea, somnolence, rare cases of suicidality	Meta-analysis of 22 trials: increased number of days of abstinence by 10% and doubled rate of abstinence, ³² but largest multisite U.S. trial was negative ³⁶	666 mg by mouth three times daily; 333 mg three times daily if creatinine clearance is 30–50 ml/min
Oral naltrexone	Blocks opioid receptors, reduces reward in response to drinking and craving	Current use of opioids, opioid withdrawal, future need for opioid analgesics, acute hepatitis or liver failure	Patient must be opioid-free for 7–10 days; if opioid analgesia needed, larger doses are required and respiratory depression is deeper, more prolonged; offer bracelet or wallet card to alert medical personnel; monitor liver function; pregnancy category C†	Nausea, vomiting, anorexia, headache, dizziness, fatigue, somnolence, anxiety, precipitation of opioid withdrawal, hepatotoxic effects at high doses	Meta-analysis of 50 trials: reduced short-term heavy drinking by 83% but did not increase abstinence ³³	50 mg daily
Extended-release injectable naltrexone	Same as oral naltrexone, but effects last 30 days	Same as oral naltrexone, plus rash or infection at injection site	Same as oral naltrexone; use caution if patient has a bleeding disorder	Same as oral naltrexone, plus injection-site reaction or infection, joint pain, muscle aches, depression, suicidality in rare cases, pneumonitis	Randomized, placebo-controlled trial: reduced heavy drinking by 25% ³⁴	380-mg gluteal intramuscular injection monthly

* All medications listed have been approved by the Food and Drug Administration for the treatment of alcohol dependence. GABA denotes γ-aminobutyric acid, and OTC over the counter.
 † Pregnancy category C indicates that adverse fetal effects have been seen in animal models and that there are no data from adequate and well-controlled studies involving humans, but the potential benefit for pregnant women might warrant use despite the risk to the fetus.

nisms of action, recommended doses, and adverse effects.

Other agents may be effective but are not FDA-approved for alcohol dependence. Short-term randomized trials have shown improved rates of abstinence and reduced heavy drinking with topiramate (but with side effects including weight loss, dizziness, and neurocognitive problems, often leading to discontinuation),³⁷ reductions in recurrent drinking with selective serotonin-reuptake inhibitors in persons with later-onset alcohol dependence or concurrent depression,^{38,39} and reduced consumption with baclofen or ondansetron, the latter in persons with early-onset alcohol dependence.⁴⁰ However, data from longer-term studies are needed to establish the effectiveness of these agents in patients with alcohol dependence.

MEDICAL-MANAGEMENT COUNSELING

Patients with alcohol dependence who do not access specialty treatment for any reason can be treated in the primary care setting with pharmacotherapy and brief medical-management counseling.³⁶ Medical-management counseling includes providing feedback on changes in laboratory tests, medical conditions, and other consequences to increase motivation; recommending abstinence as the safest goal while allowing the patient to work toward it; monitoring and facilitating medication adherence; and encouraging the use of mutual support groups.⁵ A large trial involving patients with alcohol dependence who had recently become abstinent showed that naltrexone with brief medical-management counseling resulted in a greater proportion of abstinence days than with more extensive counseling.³⁶

MUTUAL SUPPORT GROUPS

Randomized trials suggest that facilitating involvement in mutual support groups, such as AA, can reduce the risk of relapse.⁴¹ Although the 12 steps of AA guide a process of self-improvement, observational research suggests that their main effect is to build social support for sobriety.⁴² Patients who object to aspects of AA can be counseled regarding the benefits of attending sessions in order to meet sober people, obtain telephone numbers to call in case of craving or imminent drinking, and find a sponsor.⁴³

CONTINUING CARE

Up to three quarters of patients have a relapse in the year after alcohol-use treatment.^{15,44,45} Re-

lapse risks are highest during the first 3 months of sobriety and around the 1-year anniversary.⁴⁴ Specialty “aftercare” offers low-intensity, longitudinal management that includes ongoing relapse-prevention counseling and monitoring for relapse, but dropout is common. Generalist clinicians should also deliver continuing care.²³ The clinician should emphasize that care is not contingent on abstinence and should inquire at regular visits in a nonjudgmental manner about progress toward functional and treatment goals, medication adherence, attendance at specialty aftercare and mutual support groups, alcohol consumption, craving, triggers, and coping strategies. Randomized trials have suggested that providing feedback regarding objective health improvements (e.g., graphing baseline and serial serum γ -glutamyltransferase levels and reviewing the plot with the patient) can reduce drinking and possibly mortality.^{46,47} Alcohol biomarkers may be useful as motivational tools and indicators of relapse. Randomized studies have shown that supportive telephone monitoring and brief counseling can reduce recurrent drinking.⁴⁸

AREAS OF UNCERTAINTY

Although annual screening is recommended,⁵ whether a different screening interval would be more effective is unknown. Brief interventions have uncertain effectiveness for heavier drinkers⁴⁹ and in the acute care setting.⁵⁰ Simple advice might be as effective.⁵¹ The usefulness of ultra-brief and computer-based interventions requires further study.⁵² Whether a strategy of screening, brief intervention, and referral for treatment works for persons with alcohol dependence is uncertain, and predicting which of them can cut back successfully remains a challenge.^{53,54} The effectiveness of efforts by primary care clinicians to promote and monitor remission is also unknown. Medications for alcohol dependence have short-term efficacy, but long-term effectiveness remains undetermined. Chronic, severe dependence is often resistant to existing interventions, and effective strategies are needed to engage and treat patients with refractory alcohol dependence.

GUIDELINES

The U.S. Preventive Services Task Force gives a grade B recommendation (fair evidence that the benefit outweighs the harm) for screening and

brief interventions for high-risk alcohol use in adult primary care settings.⁵⁵ The NIAAA clinician's guide includes an algorithm for alcohol screening, brief intervention, and referral for specialty treatment, as well as a guideline on the use of FDA-approved medications for alcohol dependence.⁵ The recommendations in this article are consistent with those guidelines.

CONCLUSIONS AND RECOMMENDATIONS

Adults should be screened annually for risk drinking with the use of a validated measure of alcohol consumption. For risk drinkers, the assessment should determine the consumption pattern, consequences of alcohol use, alcohol-related health problems, and readiness to change drinking. Brief interventions can reduce alcohol consumption and adverse consequences in risk drinkers without alcohol dependence. Most patients with any substance-use disorder, with continued drinking despite consequences, or with unsuccessful attempts to cut back should be referred to specialty treatment programs and mutual help groups. Primary care clinicians should provide effective pharmacotherapy plus brief medical-management counseling, especially for patients who do not obtain specialty care. Given

the safety profiles of naltrexone and acamprostate, either agent is recommended, though disulfiram can be considered if the patient has an abstinence goal, someone to supervise dosing, and no contraindications.

Although the patient in the vignette is considered to be in "full, sustained remission"⁴ (i.e., he has had no adverse consequences for >12 months) and should be lauded for cutting down on his use of alcohol, he should understand that he continues to be at risk for relapse. He should be counseled that abstinence remains his safest option,⁴⁵ because only about 1 in 10 men with alcohol dependence can maintain controlled drinking over the long term.¹³ The clinician should inquire at regular follow-up visits about his alcohol consumption; its consequences and related health problems; attendance at specialty aftercare and mutual support groups; progress toward functional goals; craving, triggers, and coping strategies; and readiness to consider further reductions in drinking.

The views expressed in this article are those of the author and do not necessarily reflect the position or policy of the Department of Veterans Affairs or the U.S. government.

Discover VA physician careers.

Employing more than 14,000 physicians, Department of Veterans Affairs (VA) is the largest, most technologically advanced health care system in the United States, offering countless career opportunities for physician residents and fellows throughout the country.

At VA, physicians are part of an interdisciplinary team that delivers state-of-the-art medicine to our Nation's Veterans. In addition to the gratification that comes with serving those who have unselfishly served our country, VA physicians enjoy competitive salaries, first-rate employment benefits, a wide range of practice options, and a work/life balance that's unmatched in the industry.

Higher quality of life. Higher quality of work.

VA knows that the first step to providing superior patient care is to take care of its employees, and the quality of work/life balance VA physicians experience simply cannot be found in private practice. With predictable schedules, a virtually paperless work environment, and no billing hassles, physicians at VA are able to spend less time on administrative tasks and more time with patients. VA physicians also earn 26 days of paid annual (vacation/personal) leave starting their first year and may accumulate up to 86 days.

A well-rested medical staff has a direct impact on producing positive patient outcomes. And at VA, physicians continually push the limits of achievement:

- Years of patient satisfaction scores higher than the private sector
- Three Nobel Prizes for Medicine
- Six Lasker Medical Research Awards

- Contributions to the development of the CT scanner, artificial kidney, cardiac pace maker, nicotine patch, and hydraulic limbs

For aspiring physicians everywhere, VA offers a work environment that inspires excellence in every aspect of life. It's a culture where everyone is valued and respected. And it's a destination for those wanting to help improve the lives of our country's heroes.

More locations. More options. More opportunities.

With over 1,400 medical facilities across all 50 states, the District of Columbia, and U.S. territories, VA gives physicians the unique opportunity to practice virtually anywhere in the Nation with only one active state license. Whether working in big cities or small rural towns, VA physicians have an unparalleled variety of specialty and subspecialty options and can practice within a wide range of general medicine and primary care settings.

VA also provides physicians with numerous opportunities for clinical research, professional training and development, and upward mobility. Physicians interested in augmenting

clinical, academic, or research activities with an administrative career have a vast network of resources to help develop and enhance their administrative skills. VA also cultivates physician leadership by offering a variety of specialized in-house training, continuing education, and formal development programs, as well as funding to attend relevant external programs.

Better benefits. Better life.

Physicians at VA receive a robust benefits package that's unmatched in the private sector. It includes:

- Group health insurance plans with the majority of premiums paid by VA
- Term life insurance with family and additional coverage options
- Federal retirement consisting of pension (defined benefits plan) and the Thrift Savings Plan (similar to 401k with matching contributions)
- 26 paid annual vacation/personal days
- 13 paid annual sick days
- 10 paid annual Federal holidays
- Nationwide job transfer opportunities

VA also provides liability protection to its physicians. As Federal employees, VA physicians are protected by the Federal Government in instances of alleged malpractice or negligence resulting from the performance of their duties in or for the Veterans Health Administration of the Department of Veterans Affairs. The United States Government accepts responsibility and liability for its employees' negligent or wrongful acts or omissions during the exercise of their official duties. This applies when employees' actions are in accordance with the policies of the institution in which they are practicing.

"I'm proud to say that I work for VA. I joined VA because nowhere else could I get the gratification of working with Veterans. Our latest population of Veterans is very young and has many, many different needs, and it's continually changing in terms of the services our Veterans need. Our older patients are getting older and have geriatric issues that are also coming up. I continue learning from my patients and continue giving. And I very much recommend, if anyone is considering a career where they want to make a difference, to come to VA."

Sonia, MD
VA Chief of Primary Care

Classified Advertising Rates

We charge \$7.50 per word per insertion. **Bold typeface** is available for \$7.80 per word per insertion (**entire ad must be bold typeface**). A 2- to 4-time frequency discount rate of \$6.00 per word per insertion and \$6.80 per word per insertion for **bold typeface** is available. A 5-time frequency discount rate of \$5.85 per word per insertion and \$6.10 per word per insertion for **bold typeface** is also available. In order to earn the 2- to 4-time or 5-time discounted word rate, the request for an ad to run in multiple issues must be made upon initial placement. The issues do not need to be consecutive. **Web fee:** Classified line advertisers may choose to have their ads placed on NEJM CareerCenter for a fee of \$65.00 per issue per advertisement. The web fee must be purchased for all dates of the print schedule. The choice to place your ad online must be made at the same time the print ad is scheduled. **Note:** The minimum charge for all types of line advertising is equivalent to 25 words per ad. Confidential reply boxes are an extra \$75.00 per insertion plus 4 words (Reply Box 0000, NEJM). We will send the responses directly to you every Tuesday and Thursday. Purchase orders will be accepted subject to credit approval. For orders requiring prepayment, we accept payment via Visa, MasterCard, and American Express for your convenience, or a check. All classified line ads are subject to the consistency guidelines of NEJM.

How to Advertise

All orders, cancellations, and changes must be received in writing. E-mail your advertisement to us at ads@nejmcareercenter.org, or fax it to 1-781-895-1045 or 1-781-893-5003. We will contact you to confirm your order. Our closing date is typically the Friday 20 days prior to publication date; however, please consult the rate card online at nejmcareercenter.org or contact the Classified Advertising Department

at 1-800-635-6991. Be sure to tell us the classification heading you would like your ad to appear under (see listings above). If no classification is offered, we will determine the most appropriate classification. Cancellations must be made 20 days prior to publication date. Send all advertisements to the address listed below.

Phone: 1-781-893-3800
Website: nejmcareercenter.org

How to Calculate the Cost of Your Ad

We define a word as one or more letters bound by spaces. Following are some typical examples:

Bradley S. Smith III, MD.....	= 5 words
Send CV	= 2 words
December 10, 2007	= 3 words
617-555-1234	= 1 word
Obstetrician/Gynecologist ...	= 1 word
A	= 1 word
Dalton, MD 01622	= 3 words

As a further example, here is a typical ad and how the pricing for each insertion is calculated:

MEDICAL DIRECTOR — A dynamic, growth-oriented home health care company is looking for a full-time Medical Director in greater New York. Ideal candidate should be board certified in internal medicine with subspecialties in oncology or gastroenterology. Willing to visit patients at home. Good verbal and written skills required. Attractive salary and benefits. Send CV to: Reply Box 0000, NEJM.

This advertisement is 58 words. At \$7.50 per word, it equals \$435.00. Because a reply box was requested, there is an additional charge

of \$75.00 for each insertion. The price is then \$510.00 for each insertion of the ad. This ad would be placed under the Chiefs/Directors/Department Heads classification.

How to Respond to NEJM Box Numbers

When a reply box number is indicated in an ad, responses should be sent to the indicated box number at the address under "Contact Information."

Classified Ads Online

Advertisers may choose to have their classified line and display advertisements placed on NEJM CareerCenter for a fee. The web fee for line ads is \$65.00 per issue per advertisement and \$130.00 per issue per advertisement for display ads. The ads will run online two weeks prior to their appearance in print and one week after. For online-only recruitment advertising, please visit nejmcareercenter.org for more information, or call 1-800-635-6991.

Policy on Recruitment Ads

All advertisements for employment must be non-discriminatory and comply with all applicable laws and regulations. Ads that discriminate against applicants based on sex, age, race, religion, marital status or physical handicap will not be accepted. Although the *New England Journal of Medicine* believes the classified advertisements published within these pages to be from reputable sources, NEJM does not investigate the offers made and assumes no responsibility concerning them. NEJM strives for complete accuracy when entering classified advertisements; however, NEJM cannot accept responsibility for typographical errors should they occur.

NEJM is unable to forward product and service solicitations directed to our advertisers through our reply box service.

OGDEN, UTAH — One BC/BE Cardiac Heart Failure physician is needed to join group of nine Cardiologists. Work five days per week but take post call days off. Reading ECHO and nuclear studies are optional but available if desired. Cardiac Heart Failure support staff consists of two RNs and one medical assistant, and midlevel recruitment is likely. The McKay Dee Heart Failure Clinic mission is directed at reducing re-admissions: annual clinic re-admission rate of <1%. McKay Dee Hospital has one of the lowest 30-day heart failure re-admission rates in the country at 17% compared to 25% national average. Opportunities for clinical research exist: McKay Dee Heart Failure Clinic is one of only 75 sites in the world enrolling patients in the pivotal LAPTOP-HF trial. Current additional heart failure clinical services provided at McKay Dee Heart Failure Clinic include ultrafiltration and care coordination for patients with mechanical circulatory support including Heart Mate II and Heartware HVAD devices. Call is 1 in 9. General cardiology call coverage is partitioned equally between nine cardiologists for weekdays and weekends. Formal training in cardiac transplant and mechanical circulatory support is highly desired. Employment with the Intermountain Medical Group. Guaranteed salary. Full Intermountain benefits. Relocation provided. EOE. Send/e-mail/fax CV to: Intermountain Healthcare, Attn: Susan Jenkins, Physician Recruiting, 36 South State Street, 21st Floor, Salt Lake City, UT 84111; 800-888-3134; fax: 801-442-3388. E-mail: PhysicianRecruit@imail.org; Web: <http://physicianjobsintermountain.org>

SOUTHERN CALIFORNIA BEACH COMMUNITY — Outstanding opportunity for an invasive/noninvasive cardiologist to purchase an established practice in a highly desirable city on the beach. Flexible buy-out options. Please reply to: cardiojob.com@gmail.com

Infectious Disease

INFECTIOUS DISEASE PHYSICIAN — Saint Francis Hospital and Medical Center, Hartford, Connecticut. If you're an Infectious Disease physician seeking an outstanding practice opportunity, we can make that happen. Saint Francis Hospital and Medical Center in Hartford, Connecticut is seeking a BC/BE Infectious Disease physician to join its adult infectious disease section. In this primarily inpatient role, you'll join a group of three Infectious Disease physicians. You will also be considered for appointment to the clinical faculty of the University of Connecticut School of Medicine and have an opportunity to teach residents and fellows. The section works closely with the Connecticut Joint Replacement Institute (CJRI), and a candidate with expertise, or willingness to develop expertise, in bone and joint infections would be especially welcome. This is your chance to demonstrate strong collaborative, academic, and patient consultation skills. Come thrive in New England's largest Catholic health system with a forward-thinking culture that rewards your initiative and patient-first orientation. Join Saint Francis and share in our vision of Best Care for a Lifetime. If you're seeking to excel in your career as an Infectious Disease physician, we can make that happen! Call Christine Bourbeau, Director of Physician Recruitment today at: 855-894-5590; or e-mail your CV and letter of interest to: CBourbeau@stfranciscare.org. EOA-AA-M/F/D/V. Pre-Employment Drug Screening.

HOSPITAL MEDICINE

855.762.1650

Academic Respiriologist with Expertise in Sleep Medicine

The Department of Medicine, Queen's University, invites applications for a Geographically Full-Time appointment in the Division of Respiratory and Critical Care Medicine. The incumbent will assist the Division in fulfilling its academic and clinical missions within the Department of Medicine.

Candidates must be eligible for licensure in the Province of Ontario and preference will be given to those who either hold or are eligible for certification by the Royal College of Physicians and Surgeons of Canada in Internal Medicine with fellowship training in Respirology. The successful candidate will have completed a Sleep Medicine Fellowship (at least one year in duration) and will be able to demonstrate excellence in the performance and interpretation of sleep studies. In addition, the successful candidate will be expected to contribute to the Respiratory Consultation Service. Preference will be given to applicants who can provide evidence of scholarly activity in education or research related to respirology/sleep medicine.

Kingston is situated in the heart of historic Southeastern Ontario on the shores of beautiful Lake Ontario, midpoint between Montreal and Toronto, and the nation's capital.

Queen's is one of Canada's leading universities with an international reputation for scholarship, social purpose, spirit and diversity. All qualified candidates are encouraged to apply; however, Canadian citizens and Permanent Residents will be given first priority. Queen's is committed to employment equity and diversity in the workplace and welcomes applications from women, visible minorities, aboriginal people, persons with disabilities, and persons of any sexual orientation or gender identity.

Interested applicants should send a curriculum vitae, the names and addresses of three referees, and a teaching dossier to:

Dr. S. L. Archer, Professor and Head, Department of Medicine
c/o Ms. Nancy Koen
Rm 3039 Etherington Hall, Queen's University
Kingston, Ontario, K7L 3N6
E-mail: koenn@queensu.ca

Review of applications will continue until the position is filled.

Tulane University School of Medicine, Section of General Internal Medicine and Geriatrics is seeking BE/BC Clinician-Educators/Academic Hospitalists to join our academic ambulatory and hospitalist programs. Faculty provide ambulatory and hospitalist care at University affiliated hospitals in concert with housestaff. Applicants will join a robust academic group of clinician-educators active in scholarly activities including quality improvement and medical education. Those with experience and interest in student and resident education are desired.

Our Hospitalist program is a group of 15 teaching faculty that practice evidence-based medicine to provide the highest quality care and excellence in hospital medicine. The Hospitalist Service has a record of problem-solving and is essential to the excellent quality of healthcare at our teaching hospitals. Our ambulatory practices include teaching and nonteaching opportunities. Our internal medicine residency program has a primary track with opportunities for involvement by interested applicants.

Physicians enjoy competitive salaries and benefits package. Candidates from underrepresented minorities are encouraged to apply. No J-1, O-1 or HI-B visas please. Rank will be commensurate with experience.

Interested applicants should submit a CV and cover letter to:

Geraldine Ménard, M.D.

Section Chief, Section of General Internal Medicine and Geriatrics
SL-16; Tulane University Medical School
1430 Tulane Avenue; New Orleans, LA 70112
or to gmenard@tulane.edu

*Applications will be accepted until qualified candidates are identified.

MedStar Health
Georgetown Cancer Network

Medical Oncologists

Georgetown University
Medical Center

Expanding NCI-designated Comprehensive Cancer Center is seeking 10 BC/BE medical oncologists at the rank of Assistant to Associate Professor with a focus on clinical, translational research in Breast, Lung, GI and GU cancers. Successful applicants would be expected to apply for academic appointments at Georgetown University and membership in the cancer center.

The Lombardi Comprehensive Cancer Center of Georgetown University, directed by Dr. Louis Weiner, and the Washington Cancer Institute of MedStar Washington Hospital Center, directed by Dr. Sandra Swain, have joined to form the MedStar Georgetown Cancer Network. MedStar Health is a \$4.4 billion not-for-profit, regional healthcare system with a network of 10 hospitals and 20 other health-related businesses across Maryland and the Washington, D.C., region. The core mission for the collaboration is to expand our existing innovative disease-specific, multi-disciplinary cancer care to all MedStar hospitals in the Washington metro region. Physicians will be mentored by an outstanding group of senior clinical investigators and supported by highly skilled administrative, nursing, and Lombardi Cancer Center clinical research staff. Salaries are competitive, using a compensation model that supports activities beyond traditional clinical volumes, with start-up packages that include support for investigator-initiated trials.

All positions have a disease-specific clinical focus, joining existing programs in Breast, Lung, GI, and GU cancers. All physicians will be expected to participate in the educational mission of the Georgetown, WCI and NCI fellowship training programs. Depending on the interest and experience of an individual applicant, further expectations range from developing/expanding highly productive clinical research projects to building and expanding the Network through administrative leadership.

Interested applicants should forward their curriculum vitae and a cover letter describing a disease of interest, clinical research and administrative interest/experience to:

John L. Marshall, M.D., Chief, Hematology and Oncology
Associate Director, Lombardi Comprehensive Cancer Center
Georgetown University Medical Center
Phone: 202.444.7064 Fax: 202.444.1229
Email: marshallj@georgetown.edu

FACULTY POSITION

Assistant, Associate or Full Professor

Clinical Translational Genetics

Brigham & Women's Hospital Harvard Medical School

The Division of Genetics at Brigham and Women's Hospital, in conjunction with the Brigham and Women's Hospital Genomics Center and Partners Center for Personalized Genetic Medicine, is seeking outstanding physicians or physician-scientists in Clinical or Translational Genetics. Appointment at an appropriate academic rank at Harvard Medical School and also as Clinical Chief, Genetics or as Physician at Brigham and Women's Hospital will be commensurate with experience, training, and achievements. For more information about the BWH Genetics Division: <http://www.brighamandwomens.org/research/depts/medicine/genetics>

The expertise of applicants for this position should be in facilitating the translation of contemporary human genetic and genomic analyses into clinical practice. Demonstrated excellence in the application of DNA sequence-based information to diagnosis, counseling, and/or treatment is highly desirable. The successful applicant will help direct an emerging effort that will be enhanced by a superb local community of geneticists and academic physicians. Applicants should possess an M.D. or M.D.-Ph.D., with relevant training in the genetic basis of adult human disease. Licensure in Medicine, a Medical Sub-specialty, Pediatrics, Neurology, or Ob/Gyn is necessary, and sub-specialty training in Clinical Genetics is preferred. Interested applicants should e-mail a CV, description of research interests, and the names of 3 references by **May 15, 2013** to:

Richard Maas, M.D., Ph.D. **Christine E. Seidman, M.D.**
Co-Chairs, Search Committee
c/o Ms. Jamie Valerius
BWH Genetics Division
jvalerius@genetics.med.harvard.edu

Brigham and Women's Hospital/Harvard Medical School are Equal Opportunity/Affirmative Action Employers actively committed to increasing the diversity of our faculty; women and members of underrepresented minority groups are therefore strongly encouraged to apply.

The VA Boston Healthcare System (VABHS) seeks a dynamic physician with leadership experience in an academic medical center to become **Deputy Chief of Staff (DCOS)**. The incumbent reports to the Chief of Staff and will have responsibility and authority for the oversight of multiple clinical services and programs. The Deputy Chief of Staff will work closely with hospital leadership and committee chairs to assure the highest standards of healthcare delivery, patient safety, and clinic access. The incumbent will play a leadership role in the design, analysis, and improvement of clinical programs to assure maximal utilization of resources and to enhance provider productivity, clinical outcomes, and patient and staff satisfaction. Leadership experience or training in healthcare management is strongly preferred and academic accomplishments should be commensurate with academic appointment at the level of Assistant Professor or higher at Harvard Medical School or Boston University School of Medicine.

VABHS is the major tertiary referral center for Veterans from throughout New England and is strongly affiliated with Harvard Medical School and Boston University School of Medicine. VABHS provides the full spectrum of inpatient, residential, and outpatient medical-surgical and mental health services across three major campuses (Brockton, West Roxbury, & Jamaica Plain), five community-based outpatient clinics, and several residential rehabilitation facilities. Among VA facilities, VABHS is the nation's largest recipient of VA research dollars and one of the largest in research dollars from all sources. VABHS serves as a training site for nearly 3000 undergraduate and graduate trainees annually and has more than 120 affiliation agreements with a wide range of professional schools.

Necessary skills and experiences include the following:

- (1) Documented ability to coordinate a broad continuum of programs
- (2) Management experience with strong administrative and interpersonal skills
- (3) Demonstrated commitment to an interdisciplinary and patient-centered approach to care delivery

Leadership experience within VA and academic accomplishment are highly desirable.

A relocation bonus or recruitment incentive may be authorized for a highly qualified candidate.

Interested candidates should submit a CV and letter of interest to:

BostonDCOSsearch@va.gov

EEOC:

*Women and minorities are strongly encouraged to apply.
VABHS is an equal opportunity employer.*

**ROSWELL
PARK**
CANCER INSTITUTE

Medical Director - Roswell Park Cancer Institute

Roswell Park Cancer Institute has retained Cejka Executive Search to recruit a Medical Director. Located in Buffalo, New York, Roswell Park Cancer Institute (RPCI) is America's first cancer center founded in 1898. Today RPCI is a NCI designated comprehensive cancer center occupying 25 acres in downtown Buffalo. RPCI is a leader in cancer care, setting itself apart as a leader in surgical robotics, vitamin D research, immunotherapy and vaccine therapy, tumor microenvironment and cancer prevention and development and testing of new agents and technology.

The Medical Director of RPCI directs and manages the organization's medical affairs strategy including clinical quality and risk management, monitoring of clinical practice, medical staff policy development, physician recruitment and credentialing. Reporting to the President and CEO of RPCI, the Medical Director will coordinate and plan with other leaders the strategic and tactical aspects of the Institute's clinical services and operations.

This position requires an M.D. license to practice in the State of New York and Board Certification in associated area of oncology. Prior leadership experience leading a major oncology program and/or department in a nationally recognized academic medical center or NCI designated cancer center is required. Strong collaborative leadership skills that foster accountability, goal setting and a commitment to evidence-based healthcare and quantitative assessment are required. Candidates must have broad knowledge and a thorough understanding of the trends and forces shaping healthcare, patient care, quality and reimbursement.

Qualified candidates and nominees should contact and forward their CV to:

Deedra Hartung

Senior EVP, Managing Director

Cejka Executive Search

The Seattle Children's Research Institute and the Department of Pediatrics at the University of Washington School of Medicine are recruiting a qualified individual to serve as the **Director for the Center for Childhood Infections and Prematurity Research** at Seattle Children's Research Institute. The Center's research vision is to translate basic biology to strategies for the diagnosis, treatment and prevention of infectious diseases and conditions that impact children locally, nationally, and globally.

The Center for Childhood Infections and Prematurity Research is located on one floor of the modern 225,000 sq. ft. Seattle Children's Research Institute and has mature programs in host-pathogen interactions, global and emerging infectious diseases, vaccine discovery and evaluation, mechanisms of microbial drug resistance.

The Center Director will be responsible for the allocation of research space and available resources within the policies of the SCRI and will develop a vision for the Center, recruit outstanding scientists, support and collaborate with current scientists within the Center, mentor current and future faculty, and actively participate in philanthropic efforts on behalf of the Center and Seattle Children's Research Institute.

This is a full-time academic appointment at the rank of Professor, without tenure (M.D. and/or Ph.D. required). The successful candidate must have an established record of academic achievement and leadership experience and active NIH-funded research grants. For more information see:

www.seattlechildrens.org/research.

Please send CV and a statement of current and future research interests to:

Danielle Zerr, M.D., MPH
Chair, Search Committee
Professor, Department of Pediatrics
Division of Infectious Disease

University of Washington faculty engage in teaching, research, and service. In order to be eligible for University sponsorship for an H1-B visa, graduates of foreign (non-U.S.) medical schools must show successful completion of all three steps of the U.S. Medical Licensing Exam (USMCE), or equivalent as determined by the Secretary of Health and Human Services. The University of Washington is building a culturally diverse faculty and strongly encourages applications from female and minority candidates. The University is an Equal Opportunity Affirmative Action employer.

If you have a question about the details of this search/position please contact the hiring unit directly. Thank you for your interest in this position at the University of Washington.

GASTROENTEROLOGY

Department of Veterans Affairs, Central Texas Veterans Health Care System (CTVHCS), in Temple Texas is accepting applications for a staff Gastroenterologist. Candidates must be US citizens, possess a valid and unrestricted license in any state, and be Board Certified/Board Eligible in Gastroenterology. Non-citizen applicants will be considered. CTVHCS is affiliated with Texas A&M University System Health Science Center, and applicants should be qualified for academic appointments. Texas A&M fellows in gastroenterology rotate through VA and active participation in teaching students, residents and fellows is anticipated.

CTVHCS is one of the largest VA health care systems in the country with Computerized Patient Records. Resources in Temple include a fully equipped endoscopy suite. Responsibilities range from outpatients to consultative service for inpatients to the performance of GI specialty procedures. Endoscopic Ultrasound and ERCP skills are very desirable. Research experience in clinical gastroenterology is desirable. Salary is commensurate with qualifications.

Texas has no state income tax and features a low cost of living. CTVHCS consists of two medical centers located in Temple and Waco, an outpatient clinic in Austin, and four community based outpatient clinics. Temple, a city of nearly 60,000 is located in central Texas. It is about 60 miles north of Austin, the Live Music Capital of the World, and 35 miles south of Waco, home of the Dr. Pepper Museum, along Interstate 35. It is approximately centered in a triangle formed by Houston, San Antonio, and Dallas-Ft. Worth. Temple has it all - hometown friendliness with big-city opportunities, including substantial industries, world-famous medical centers, top-ranked educational institutions, exciting arts and cultural activities. CTVHCS is a teaching medical center, providing a full range of patient care services, with state-of-the-art technology as well as education and research. Temple is home to one of Texas A&M Health Science centers, located within minutes of the hospital which provides residency and fellowship programs.

Reasonable accommodation provided to any applicant with disabilities. Applicants are subject to random drug testing. Equal Opportunity Employer

Director, Kidney Institute of New Mexico, University of New Mexico

The University of New Mexico, Health Sciences Center, Department of Internal Medicine, seeks applications for the Director of the Kidney Institute of New Mexico (KINM). This position is the founding Director of a new research institute funded by a generous gift from Dialysis Clinic Inc. We seek an accomplished scientist with a strong record of academic achievement and administrative leadership. Commitment to a comparative effectiveness approach to improving kidney disease outcomes is essential. We also seek a candidate with a record of sustained extramurally supported research in a kidney-related field and a compelling vision for the development and future of the KINM. The director is expected to foster a growing interdisciplinary research program in kidney disease with investigators in nephrology, biostatistics, epidemiology, pathology and translational research. This is a Tenure Track, Open Rank level position, reporting directly to the Chief of Nephrology in the Department of Internal Medicine. Salary and rank will be commensurate with experience and education.

In this role, the successful candidate will provide strong leadership and direction for scholarly activities of the Kidney Institute of New Mexico. The successful candidate will be an investigator with proven excellence in leadership, a commitment to develop junior faculty, and an outstanding record of funded research.

Minimum Requirements:

1) Must be eligible to work in the US and
2) candidates must have a Ph.D., M.D. or M.D./Ph.D. degree and academic credentials for a tenured faculty appointment at the University of New Mexico.

Desirable Qualifications:

1) Established scientist, 2) directly related leadership experience, including mentorship of junior faculty, and 3) established track record of extramural funding. This is not a J-1 Visa opportunity. This position may be subject to a criminal records screening in accordance with New Mexico law.

For Best Consideration, please apply by: March 20, 2013; however, this position is open until filled.

For complete description and application requirements for posting #0818718, please see the UNMJobs application system at: <https://unmjobs.unm.edu>.

Inquiries may be directed to:

Pope L. Moseley, M.D.

Search Committee Chair, Chair of the Department of Internal Medicine, University of New Mexico
attn: PMoseley@salud.unm.edu

DIRECTOR, HEALTH SERVICES RESEARCH OPPORTUNITY

Geisinger Health System (GHS) is seeking a Director, Health Services Research, to lead a system-wide health services research program and to join a growing, multi-disciplinary research effort focused on advancing the science of medicine, improving the effectiveness of healthcare for each patient and reducing the total cost of care.

About the Position

The Director, Health Services Research will support the development and evaluation of Geisinger's innovative approaches to redesigning health care to identify the most effective ways to organize, manage, finance, and deliver high quality care; reduce medical errors; and improve patient safety. The Director will provide active developmental leadership to a multi-disciplinary team of researchers examining the social, financial, organizational, medical and personal factors that affect access to health care, the quality and cost of health care, and quantity and quality of life.

Research Opportunities Include:

- Utilizing Geisinger's longitudinal Electronic Health Record (EHR) data and enterprise data warehouse information to identify and quantify disease risk factors or predictors of disease progression
- Developing patient, physician or other targeted interventions to improve quality and/or reduce cost of care and/or evaluating the clinical and economic impacts
- Studying the impact of payment innovations (e.g. bundled payment; shared savings programs) on quality and cost of care
- Patient engagement/activation, including strategies for increasing patient compliance
- Identify factors associated with successful and unsuccessful dissemination of Geisinger innovations to other health care delivery systems

Job Requirements:

- PhD and/or MD degree required; candidates with additional degrees, including MPH, MPP, MBA or related degrees are preferred
- At least 7 yrs of experience performing health services research in an academic, private research, health plan, health care delivery, or government setting
- A track record of success in publishing articles in major research/health services/health policy/medical journals
- A track record of success in obtaining peer reviewed funding from public and/or private sources
- Candidates with experience overseeing a team and mentoring young investigators are strongly preferred
- Preference will be given to individuals with a rank of Associate Professor or higher

Discover for yourself why Geisinger has been nationally recognized as a visionary model of integrated healthcare. For more information, please visit Join-Geisinger.org or send CV and cover letter to: David Ledbetter, PhD, Chief Scientific Officer c/o Jocelyn Heid, Manager, Professional Staffing, at 1-800-845-7112 or jheid1@geisinger.edu.

GR11_133F

Deputy Chief of Staff

The **WJB Dorn Veterans Affairs Medical Center** is seeking a Physician to serve as the Deputy Chief of Staff (DCOS) to provide administrative, clinical, and programmatic leadership for medical services to ensure achievement of the clinical, research, and education goals and applicable performance measures. The incumbent is accountable for the delivery of all health care by the staff of all clinical services except Research and Education. This responsibility includes the administration, management, and leadership for a comprehensive program of medical care. Additionally, the Deputy Chief of Staff participates in top level decision and policy design that relates to clinical care. The DCOS directs health care programs, delegating authority and responsibility to meet both the medical center and service goals. The incumbent reports to the Chief of Staff and serves as a key clinical resource for the Medical Center Director and the Chief of Staff as part of the key leadership team of the medical center.

Dorn VA offers competitive salaries, retirement, insurance, and up to 26 paid leave days yearly. Travel expenses (moving costs) are authorized. Columbia is the geographic center of South Carolina, and affords all the opportunities you would expect in a capital city including museums, theaters, shopping, and dining. Columbia boasts a nationally acclaimed library system, highly rated schools, and many outstanding golf courses. Big time college sports abound with two major schools – the University of South Carolina in Columbia, Southeastern Conference, and Clemson University in Clemson, Atlantic Coast Conference (two hours away). Columbia also offers easy access to the mountains (two hours west) and nationally recognized beach resorts (two hours east) as well as professional sports' NFL Carolina Panthers and NBA Charlotte Bobcats less than 1 ½ hours north.

Interested individuals should apply via:

<http://www.usajobs.gov> to Vacancy ID #: OE-12-TCM-833017.

For additional information and/or application instructions contact:

Therese Mazloom, Human Resources (05M)
Phone: 803-776-4000, extension 6264.

UNIVERSITY of MARYLAND
SCHOOL OF MEDICINE

The General Internal Medicine Division in the Department of Medicine at the University of Maryland School of Medicine has openings for full-time internists on our inpatient Hospitalist Teams.

HOSPITALISTS (NOCTURNISTS) (*Positions 3-309-703 & 704*) - These positions will work 10 shifts every 28 days. Duties include coverage of the Advanced Heart Failure (AHF) service with fellow backup and will encompass work up of new admissions and coverage of existing patients, placing central lines and arterial catheters. Cardiology attendings are also available as needed to assist with diagnosis and treatment plans. There may be opportunities for teaching of interns and residents on the primary cardiology service if one of their patients becomes unstable or if they are uncomfortable/unsuccessful performing a procedure. Qualified candidates will be BE/BC in internal medicine. Although this is a general Internal Medicine hospitalist position, those interested in applying for Cardiology fellowship are encouraged to apply. Adequate comfort level with EKG's and signs of arrhythmias and decompensation is strongly desired.

ACADEMIC HOSPITALISTS (*Positions 3-309-705, 706 & 707*) - These positions incorporate service at our main hospital and an affiliated hospital, both located in downtown Baltimore, Maryland. Both services provide 24/7 coverage for inpatient medicine floors and include a physician-assistant. Opportunities are available for teaching. Ideal candidates will possess outstanding clinical and teaching skills and a strong commitment to patient care, as well BE/BC in internal medicine.

CANCER CENTER HOSPITALIST (*Position 3-309-715*) - Located within the Marlene and Stewart Greenebaum Cancer Center, this service is responsible for managing medical conditions associated with malignancies as well as overseeing routine chemotherapy admissions with complete support from Oncology attendings. All hospitalist services provide 24/7 coverage and there are opportunities available for teaching. Ideal candidates will be BE/BC in internal medicine, possess outstanding clinical skills, have a strong commitment to general patient care and interest in teaching. Candidates interested in pursuing a future career in oncology are encouraged to apply.

Faculty rank and tenure status for all positions is commensurate with candidate's qualifications and experience. Excellent salary/benefits package available. Qualified candidates should apply by e-mail by sending CV and names of 4 references to **Robyn Crandell** rcrandel@medicine.umaryland.edu

The University of Maryland, Baltimore is an Equal Opportunity, Affirmative Action employer. Minorities, women, veterans and individuals with disabilities are encouraged to apply.

When applying, please cite specific position number of interest in your correspondence.

Department of Health and Human Services
National Institutes of Health - National Cancer Institute
ANNOUNCEMENT: CHIEF, CLINICAL GENETICS BRANCH

The Division of Cancer Epidemiology and Genetics (DCEG), National Cancer Institute (NCI), National Institutes of Health (NIH) is recruiting a senior clinician scientist or epidemiologist to serve as Chief of the Clinical Genetics Branch (CGB). The CGB conducts interdisciplinary research to advance the understanding of the molecular pathogenesis of cancer and to translate this knowledge into effective evidence-based medical management strategies (including counseling, prophylaxis, screening, surgical risk reduction, and chemoprevention) for cancer-prone individuals and families. Current active protocols target hereditary cancer susceptibility syndromes, inherited bone marrow failure syndromes, risk of cancer in medical conditions not typically thought to include cancer in their classical phenotype, and a portfolio of human papilloma virus-related translational research projects; most have integrated behavioral/counseling/psychosocial research. Study-derived biospecimens are routinely leveraged into collaborative, laboratory-based, etiologically-oriented analyses of genomics and molecular susceptibility.

The Branch Chief will have the opportunity and resources to conduct an independent program of research and to shape the research direction of CGB. CGB currently includes a staff of 4 tenured or tenure-track investigators as well as staff clinicians/staff scientists, senior research nurse, senior genetic counselor, pre- and post-doctoral fellows; additional recruitments are anticipated. CGB resources include collections of cancer-prone families, cohorts of patients at risk of cervical carcinoma by virtue of persistent HPV infection, access to biorepositories for processing and storage of biospecimens, a core genotyping and other laboratory facilities, and contracts for computer programming and for family and epidemiologic field studies, including nurses and genetic counselors. In addition to managing these resources, the Chief oversees the administrative management of the Branch, supervises staff members, mentors tenure-track investigators and post-doctoral fellows, and ensures the scientific quality of CGB research. Other duties include providing consultation to national and international investigators and public health officials, and acting as liaison with agencies and organizations seeking expertise related to cancer genetics, cancer genetic counseling, cancer susceptibility and risk assessment, and cancer prevention.

The successful candidate must hold either a medical degree or a doctoral degree in genetics, epidemiology or related fields. He or she must demonstrate knowledge of clinical cancer genetics and genetic risk assessment as well as a proven ability to: (1) conduct high-quality original research using epidemiologic and interdisciplinary approaches to investigate the role of genetic susceptibility to cancer; and (2) publish such work in peer-reviewed scientific or medical journals and present it at scientific meetings. The candidate must also demonstrate administrative experience, including supervision at a senior level of scientific management.

The Chief, Clinical Genetics Branch will be eligible for a tenured appointment at a salary commensurate with his/her qualifications and experience. Full Federal benefits including leave, health and life insurance, long-term care insurance, retirement, and savings plan (401k equivalent) will be provided. Qualified candidates may be considered for the NIH Senior Biomedical Research Service.

Interested individuals should send a cover letter, curriculum vitae and bibliography, a brief summary of research interests and accomplishments, scientific administrative experience, copies of up to five publications or preprints, and the names and addresses of three references to:

Ms. Catherine McClave
Division of Cancer Epidemiology and Genetics, National Cancer Institute
6120 Executive Blvd., Room 8062, Bethesda, MD 20892
E-mail: mcclavec@mail.nih.gov

Applications received by **April 30, 2013** will be considered for a first round of interviews, but applications will be accepted until the position is filled.

The DHHS and NIH are Equal Opportunity Employers

CHAIR
DEPARTMENT OF RHEUMATOLOGY

OCHSNER HEALTH SYSTEM in New Orleans is searching for a **CHAIR OF THE DEPARTMENT OF RHEUMATOLOGY**. The successful candidate will be an excellent clinician with proven leadership and management abilities, musculoskeletal ultrasound interest and skills, clinical/basic research expertise, and experience with undergraduate and/or graduate medical education. The department includes six physician members who practice all aspects of Rheumatology including some with an interest in musculoskeletal ultrasound. Our accredited two year training program includes four fellows. Salary offered will be competitive and commensurate with experience and training.

At Ochsner our mission is to Serve, Heal, Lead, Educate, and Innovate. Ochsner Health System is a physician-led, non-profit, academic, multi-specialty healthcare delivery system dedicated to patient care, research, and education. The system includes eight hospitals and more than 38 health centers throughout Southeast Louisiana. Ochsner employs over 850 physicians representing all major medical specialties and sub-specialties. We conduct over 300 ongoing clinical research trials annually. We also enjoy the advantage of practicing in a favorable malpractice environment in Louisiana. For additional information, please visit our website at www.ochsner.org.

Ochsner Health System and The University of Queensland Medical School in Brisbane, Australia began a unique, joint partnership in 2009 by opening the University of Queensland School of Medicine Clinical School at Ochsner, providing U.S. medical students with an unprecedented educational experience.

New Orleans is a cosmopolitan, historic city with unique architecture, multiple medical schools and academic centers, professional sports teams, world-class dining and cultural interests, and world-renowned live entertainment and music.

Interested physicians should send curriculum vitae for review to:

Joseph R. Dalovisio, M.D.
Associate Medical Director for Medical Specialties
email: profrecruiting@ochsner.org, Ref. #ACDRO3
Information: (800) 488-2240

INTERVENTIONAL CARDIOLOGIST Assistant or Associate Professor

The Department of Medicine, Division of Cardiovascular Medicine at the University of Virginia seeks Interventional Cardiologist candidates for a tenure-eligible Assistant or Associate Professor or a tenured Associate Professor.

The incumbent will actively participate in the teaching program with cardiology fellows and medical house staff. The opportunity to participate in an active research program exists for the right incumbent.

Candidates must have an MD and be Board Certified in Cardiovascular Disease and Interventional Cardiology with a minimum of 5 years of training/experience in complex peripheral vascular interventions including atherectomy, laser, and revascularization of total occlusions. Expertise in vascular ultrasound will be a plus.

To apply for the tenure-eligible position, visit <http://jobs.virginia.edu> and search on **Posting Number 0611254**. Complete a Candidate Profile online, attach a cover letter, curriculum vitae and contact information for three references. The tenure-eligible faculty position is designed for physicians with an interest in a balanced career of clinical care, clinical research and teaching.

To apply for the tenured position, visit <http://jobs.virginia.edu> and search on **Posting Number 0611255**. Complete a Candidate Profile online, attach a cover letter, curriculum vitae and contact information for three references. The tenured faculty position is designed for physicians with an interest in a balanced career of clinical care, clinical research and teaching.

For additional information about the position, please contact Dr. Brian Annex, via email at BHA4N@virginia.edu or phone **434-982-0853**.

For additional information about the application process, please contact Ally Mawyer, via email at AML4D@virginia.edu or phone **434-422-2317**.

The University of Virginia is an Equal Opportunity/Affirmative Action Employer. Women, minorities, veterans and persons with disabilities are strongly encouraged to apply.

Chief of Pulmonary, Critical Care and Sleep Medicine

Johns Hopkins University School of Medicine is seeking applications for the position of Chief, Division of Pulmonary, Critical Care and Sleep Medicine. The current division chief has assumed the role of Executive Vice Dean for the Johns Hopkins University School of Medicine. This division is comprised of over 60 full-time faculty.

The division:

- ◆ Provides state-of-the art patient care of the highest quality and compassion.
- ◆ Advances this state-of-the art through biomedical research.
- ◆ Teaches fellows, residents, and other trainees the knowledge and skills they will need to sustain this mission into the future.

The division has outstanding research programs in acute lung injury, pulmonary hypertension, asthma, chronic obstructive pulmonary disease, and sleep. There are exceptional clinical programs in critical care, cystic fibrosis, sarcoidosis, pulmonary fibrosis, sleep and lung transplantation.

Qualifications include board certification in pulmonary and critical care medicine, established evidence of academic achievements that demonstrate national leadership and international reputation with an emphasis on basic or translational bench research, administrative skills and outstanding communication ability.

Applicants should submit a curriculum vitae and a list of three references to:

Susan M. MacDonald, M.D.
Professor of Medicine

Associate Chair, Department of Medicine
Chair of the Pulmonary and Critical Care Search Committee
E-mail: smacdona@jhmi.edu

Johns Hopkins University is an affirmative action/equal opportunity employer. Women and minorities are encouraged to apply.

Faculty Position, University of California San Diego.

The Department of Medicine (<http://med.ucsd.edu>) at the University of California San Diego (UCSD) is committed to academic excellence and diversity within the faculty, staff, and student body.

The Division of Nephrology is initiating a search for a new faculty position for a renal epidemiologist and clinical researcher with a research focus in the relationship of calcium and phosphorus homeostasis with adverse outcomes in patients with kidney disease. Appointment will be made at the Assistant or Associate Professor rank, and will include tenured status. The candidate must be board certified in Nephrology and must be eligible for California medical license. Therefore, candidates must have an M.D. and an MPH, or equivalent. The successful candidate will have a robust extramurally funded research program, place high priority on teaching medical and graduate students in epidemiology and kidney disease, and mentoring the next generation of investigators.

The Department is interested in strong candidates who have demonstrated commitment to excellence by providing leadership in teaching, research, service, and building an equitable and diverse scholarly environment. Salary is commensurate with qualifications and based on the University of California pay scales. Review of applications will begin March 1, 2013 and continue until the position is filled.

Interested individuals should send their CV, a list of references, and a separate statement summarizing their experiences and their vision for professional contributions in the area of equity and diversity (see <http://facultyequity.ucsd.edu/Faculty-Applicant-C2D-Info.asp> for further information) to:

Francis Gabbai, M.D., Chair, Search Committee
9500 Gilman Drive #0618, La Jolla, CA 92093-0618
fgabbai@ucsd.edu

UCSD is an Affirmative Action/Equal Opportunity Employer with a strong institutional commitment to excellence through diversity.

Chief, Section of Dermatology

Reading Hospital is seeking a Chief, Section of Dermatology to be responsible for the full spectrum of Dermatology services, including direct ambulatory, private patient care, inpatient consults and teaching of Internal Medicine and Family Medicine residents and medical students. The Section of Dermatology also supports the Post-Acute Rehabilitation Hospital, acute hospitalized patients and the hospital-based ambulatory Dermatology clinic. Duties will be divided among administration, clinical practice and medical education. The ideal candidate must have a strong passion for academics and work closely with the Residency Program Directors to develop a Dermatology curriculum.

Qualifications:

- MD/DO degree
- Completion of a Dermatology residency; BE/BC in Dermatology
- Licensed to practice medicine in Pennsylvania
- 3+ years of experience as a practicing Dermatologist
- Leadership and management experience plus strong interest in academics and clinical research are preferred

We offer a competitive salary and benefits package including sign-on bonus, relocation assistance, malpractice insurance and educational loan forgiveness. For more information, please contact **Maddie Wagner, Medical Staff Recruiter, (610) 898-5641** or maddie.wagner@readinghealth.org.

Save the Date for Abstract Submission

The American Heart Association's Scientific Sessions is the premier cardiovascular conference for basic, translational, clinical and population science. Lead the way to discovery in the fight against heart disease and stroke and save the date to submit your best science now!

PUBLISHED ABSTRACTS

- Accepted abstracts are published in *Circulation*, an American Heart Association journal. *Circulation* continues to hold the **#1 ranking for Impact Factor (14.739)** in the Cardiac & Cardiovascular Systems subject matter category, according to the 2011 *Journal Citation Reports*® (Thomson Reuters, 2012)
- Authors of the abstracts at the AHA Scientific Sessions had 24% higher odds of being published than their peers at the other meetings. **AHA also accrued the highest mean impact factor, at 4.8**, compared with 4 for ACC and 3.9 for ESC. (*Circulation*, 2012)
- Your accepted abstracts could receive international coverage and visibility from media outlets such as: *Associated Press*, *Wall Street Journal*, *MSNBC*, *CNN*, *ABC*, *Forbes*, *US News & World Report*, *WebMD*, *MedPage Today*, *TheHeart.org*, *HealthDay* and many more. Their coverage and other media could create more than 3 billion media impressions.

NETWORK WITH GLOBAL LEADERS

- Discuss your findings with more than 18,000 cardiovascular experts from more than 105 countries, in addition to sharing your findings with more than 1.5 million virtual professional attendees.

AWARDS & TRAVEL

- More than \$150,000 in awards and travel grants are available to early career investigators, trainees and students submitting abstracts to Scientific Sessions. For more information on these awards, please visit the Councils page at my.americanheart.org. These opportunities are a benefit of AHA membership. To join please visit my.americanheart.org/membership
